

INSTRUCTIONS FOR REGISTERING A PRIVATE DENTAL LABORATORY

Any dentist who operates a dental laboratory in his or her dental office and employs a dental technician is required to register the laboratory with the Kentucky Board of Dentistry.

There is no fee to register a private dental laboratory.

All technicians with two (2) or more years of training and/or experience are required to register as a dental laboratory technician and pay the \$10.00 registration fee.

The laboratory may process work **only** for the dentist/s in that office location.

NOTE: If cases are received from other dentists outside of the office location, the laboratory is then considered to be a commercial dental laboratory and must register and pay the fee as such.

INSTRUCTION FOR REGISTERING A DENTAL LABORATORY TECHNICIAN IN A PRIVATE DENTAL LAB

Anyone working as a dental laboratory technician who has two or more years training and/or experience must register with the Kentucky Board of Dentistry.

The application should be carefully completed and sworn to before a Notary Public.

All questions must be answered and a photograph of the registering technician attached to the application.

There is a \$10.00 registration fee for each technician being registered.
